“It's Easy - I'll Show You How”

Health App on Your iPhone

Improved Battery for iPhone and iPad

Analyze Battery Usage

Determine How to Manage & Get Most of Battery Time

How to Refresh

Your Locations Affect Usage

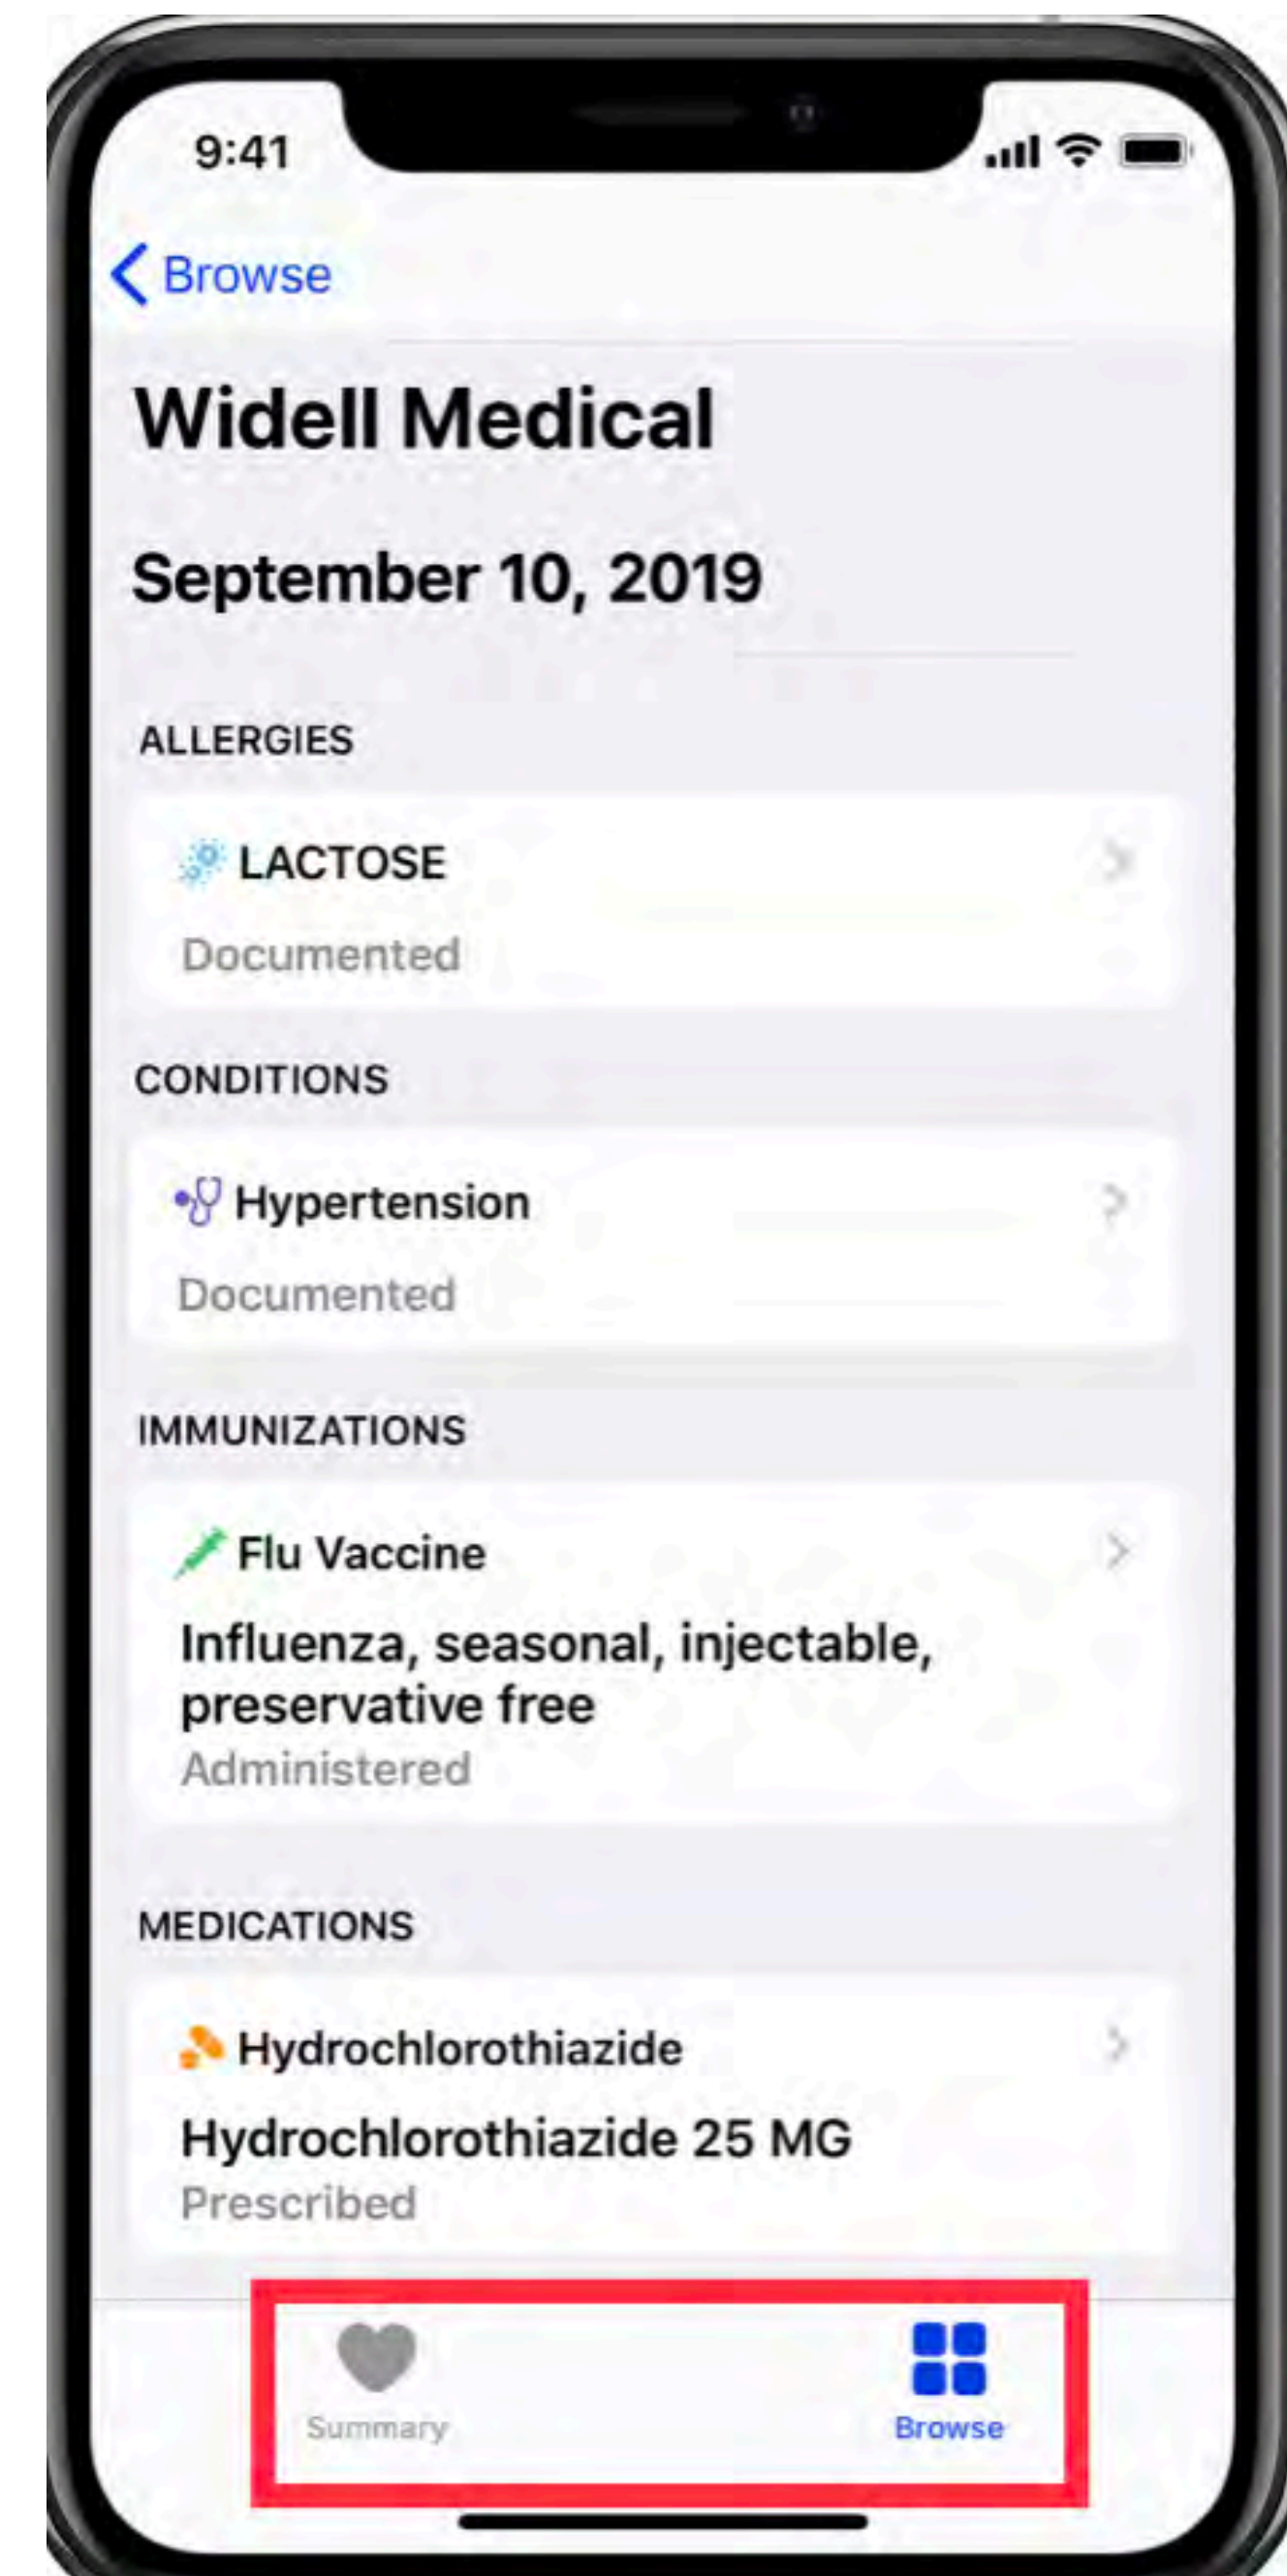

Emergency to Conserve

Most of you have heard me urge you to complete the Health App (white app with red heart) on your iPhones. Some of you have forgotten or neglected to do this most important feature on your devices. Remember, that EMT do not need your pass code to get to this Vital and life saving info if you are not able to communicate.

How to set up your Medical ID

Open the Health app and tap the Summary tab.

Tap your profile picture in the upper-right corner.

Under Medical Details, tap Medical ID.

Tap Edit in the upper-right corner.

To make your Medical ID available from the Lock screen on your iPhone, turn on Show When Locked.

In an emergency, this gives information to people who want to help.

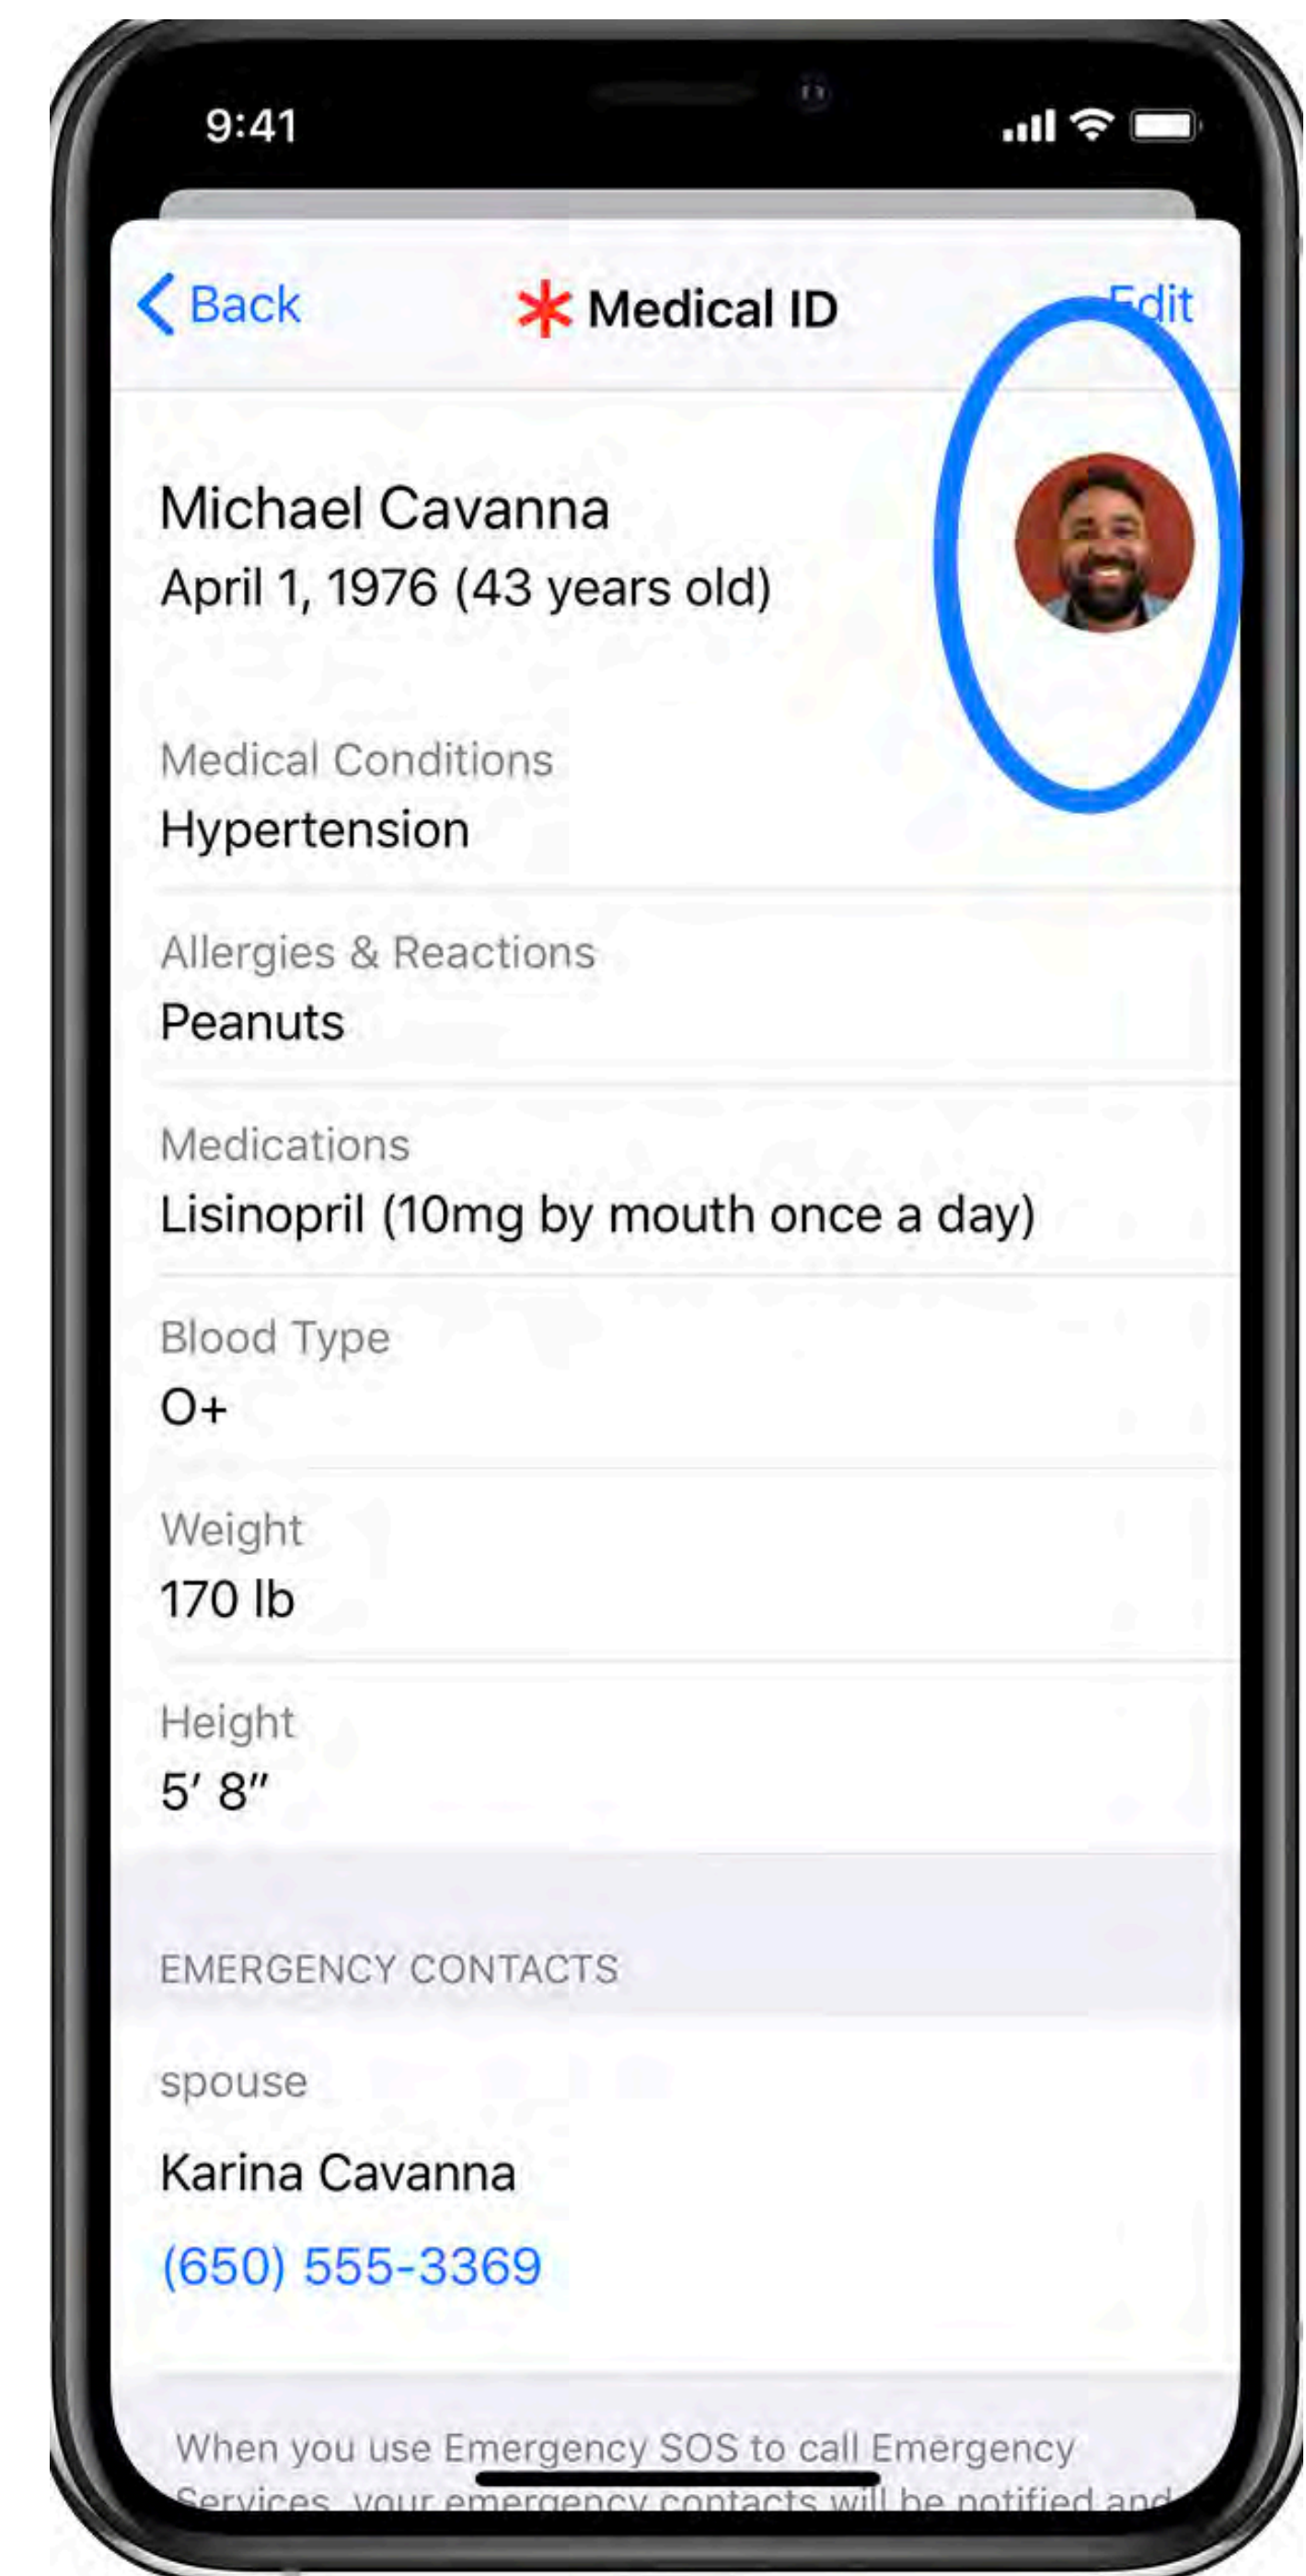

To share your Medical ID with emergency responders, turn on Share During Emergency Call.

When you make a call or send a text to emergency services on your iPhone or Apple Watch, your Medical ID will automatically be shared with emergency services.*

Enter health information like your date of birth, allergies, and blood type.

Tap Done.
